SendCUIEmail Development Team
Software Engineering

DATE: January 21, 2026

TO: Project Record

SUBJECT: Multiple CUI Subcategory Selection Support

OFFICE OF PRIMARY RESPONSIBILITY: SendCUIEmail Project

1. **Purpose**

This memorandum documents the decision to support multiple CUI subcategory selection in SendCUIEmail, enabling proper CUI banner markings per 32 CFR Part 2002.

2. **Decision**

SendCUIEmail now supports selecting multiple CUI subcategories. Users can combine subcategories (e.g., SP-CTI and SP-EXPT) to create proper compound markings like CUI//SP-CTI//SP-EXPT.

3. **Regulatory Basis**

32 CFR Part 2002.20(a)(3) states:

“When CUI is designated by more than one Safeguarding or Disseminating Control, authorized holders may use an abbreviated marking that combines the Controls. The abbreviation includes the word CUI or the CUI acronym followed by two slashes, the category or subcategory abbreviation, two more slashes, and so forth for each additional category or subcategory.”

Example from 32 CFR: CUI//SP-CTI//SP-EXPT

This marking indicates information that is both Controlled Technical Information **and** Export Controlled.

4. **Implementation**

Previous Behavior (v0.1.0–v0.4.0):

- Single selection from predefined options
- Options: CUI, CUI//SP-CTI, CUI//SP-EXPT, CUI//SP-PRVCY, CUI//SP-PROPIN

- Could not combine subcategories

New Behavior (v0.5.0+):

- Multi-select using comma-separated input (e.g., “1,2” for CTI+EXPT)
- Generates proper compound marking: CUI//SP-CTI//SP-EXPT
- Option 0 or empty input defaults to basic CUI
- Invalid selections fall back to basic CUI with warning

User Interface:

Select CUI Subcategories (can select multiple per 32 CFR Part 2002):

```
[0] CUI (basic - no subcategory)
[1] SP-CTI - Controlled Technical Information
[2] SP-EXPT - Export Controlled
[3] SP-PRVCY - Privacy
[4] SP-PROPIN - Proprietary Business Information
```

Enter selection(s) separated by commas (e.g., '1,2' for CTI+EXPT)
Or press Enter for basic CUI

Selection: 1,2

Result: CUI//SP-CTI//SP-EXPT

5. Supported Subcategories

Code	Abbreviation	Description
1	SP-CTI	Controlled Technical Information
2	SP-EXPT	Export Controlled (ITAR/EAR)
3	SP-PRVCY	Privacy (PII, HIPAA, etc.)
4	SP-PROPIN	Proprietary Business Information

Common Combinations:

- CUI//SP-CTI//SP-EXPT – Technical info that is also export controlled
- CUI//SP-PRVCY//SP-PROPIN – Privacy data that is also proprietary
- CUI//SP-CTI//SP-PRVCY – Technical info containing PII

6. Backward Compatibility

Existing encrypted files remain fully compatible. The CUI marking is stored in the README.md and email templates, not in the encrypted file format. Files encrypted with previous versions can still be decrypted with current or future versions.
